InFocus Mondopad vs. Interactive Displays

versus

Mondopad

- All-in-One Integrated Windows 7 based tablet enables your whole team to Present, Annotate & Collaborate
- Make presentations, annotate right on top of them and collaborate among your meeting participants; in-room or globally
- Mondopad is built around standards and industry leading technologies from Intel and Microsoft
- Collaborate with industry standard tools like GotToMeeting, WebEx, and Microsoft Lync seamlessly on Mondopad
- Manage Mondopad as just another PC on your network.

Interactive Displays

- Piece part systems originally targeted to Education not the Business market
- Requires separate Client system(s), components and added licensing fees to properly collaborate
- Costly Software & Licensing Fees for each Client to do basic operations
- More Costly Software and Licensing Fees to add proprietary extended collaboration features to each client endpoint
- Software may or may not be reserved for the display, IT will need to track each client & software rev, new team member must purchase software
- Training is normally required for deployment, and cost more money

- Interactive Displays: Smart Technologies, Promethean, Mimio, Perceptive Pixel, sharp
- Interactive Whiteboards: Ebeam, Epson, Hitachi, Promethean, Samsung, Sharp

InFocus Mondopad vs. Video Conferencing system

versus

Mondopad

- All-in-One Integrated Windows 7 based tablet enables your whole team to Present, Annotate & Collaborate
- Make presentations, annotate right on top of them and collaborate among your meeting participants; in-room or globally
- Mondopad is built around standards and industry leading technologies from Intel and Microsoft
- Collaborate with industry standard tools like GotToMeeting, WebEx, and Microsoft Lync seamlessly on Mondopad
- Manage Mondopad as just another PC on your network.

Video Conferencing

- Piece part systems originally targeted to Business market
- Costly investment with single function
- Display needs to be connected to complete solution
- Confusing for average person to use, normally requires admin to assist with every call
- Can only make video calls with other video systems, there is no way to integrate Skype, Lync or other PC based video conferencing
- Some systems have software maintenance fee
- Polycom, Lifesize, Cisco,

Sharp PN-L__2B

- It is a Interactive display only
- PC module is a optional purchase
  - PN-TPC2w7a, Intel Pentium Processor G620
  - Mounts to back of display
- Video Conferencing requires endpoint like Polycom, Lifesize or cisco to be attached
